Software Skills

C, C++, C#
Python
SQL, PHP
JavaScript, Angular
HTML, CSS
Bootstrap
Microsoft Office
Windows, Linux

04.2023 – Current
Tehran, Iran

11.2017 – 10.2022
Hannover, Germany

08.2013 – 06.2015
Sari, Iran

CAREER OBJECTIVE

An organized individual with more than 4 years of experience in software development. Have well understanding and knowledge in computer software programs seeks employment as a programmer or IT intern to develop and maintain software or other systems. Also bring the last college degree, strong attention to detail, and accuracy. Committed and collaborated in engineering projects to meet and client requirements. Passionate to contribute my skills and expertise developing software as part of a team.

Engineering

Specialist knowledge and expertise in:

- Development and programming languages
- Discussing business requirements with client
- Creates, designs and deploys or update application
- Maintaining and debugging programs
- Monitoring and troubleshooting algorithm process
- Process and software quality control experience
- Change management implementation in the firm by well communication skills
- Collaborating with other teem members, including software tester and quality assurance analysts
- Build clean and efficient code based on user need
- Write and update technical documentation
- Identifying of areas for operational improvements and implement necessary

WORK EXPERIENCES

- Web developer at Aiolearn team company
  - Design, development and testing of new features
  - Learning new algorithms technologies for optimizing projects
  - Implement, test and bug-fix functionality
  - Responsible for regular communication with others involved in the development process

- C# Software Developer at iSon International team company
  - Rendering services, testing-developing software
  - mongering of Host Affairs
  - maintaining of WHMCS servers

- C#.Net and SQL Software developer at Dibagaran company
  - Development and create new solutions in C#.Net
  - maintaining and editing customer data and information in SQL
  - learning new technologies and AI solutions
  - collaboration with data maintaining manager

09.2011 – 06.2012
IUST, Tehran, Iran

09.201 – 05.2011
IUST, Tehran, Iran

Education

10.2008 – 03.2012
B. Sc. Software Engineering
(IUST)Iran University of Science
and Technology (Note: 2.6)

09.2005 – 06.2008
Diploma of Mathematics and
Physics
Sari, Iran (Note: 1.4)

Languages

English
German
Persian

References

Available upon request

- C# Software developer at Iran University of Science and Technology
  - Writing and testing code
  - Debugging and troubleshooting with careful planning and testing
  - Maintaining and updating existing software
  - Staying up to date with industry trends

- C++ Software developer at Iran University of Science and Technology library project
  - Code profiling, version control in research and design.
  - Be working in small development university team group
  - Learning new algorithms technologies for optimizing projects
  - Code design and maintaining
  - Learning complete software life-cycle implementation

RROJECT DEVELOPMENT

06.2013 – 10.2015   Location: Dibagaran Sari, Iran
Title: Learning how being a student-client application developer of windows program for university (C++).

07.2011 – 03.2012   Location: Iran University of science and Technology (IUST)
Title: Requirement Engineering: Simulation of requirement engineering with implementation of use cases in Rational Rose and translate application storyboards and use cases into functional applications in C#.

08.2010 – 06.2011   Location: Laboratory of IUST
Title: Research on selection of program algorithm of windows programs on C++ PL.

TECHNICAL SKILLS

ENGINEERING
- coding programs, distinguish different data structure types and analyze
- optimized algorithms
- intricate testing process and knowing different components of software testing

SCIENTIFIC
- implementation of up-to-dated software technologies specially machine earning and Artificial Intelligence
- Detect patterns and make connection between information
- Design and prepare machine learning models

SOFTWARE
- Choosing the best IDE for programming and integrating a project
- Object oriented programming
